

I-69 BRIDGE AT SAN JACINTO EMERGENCY REPAIR

"Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods."

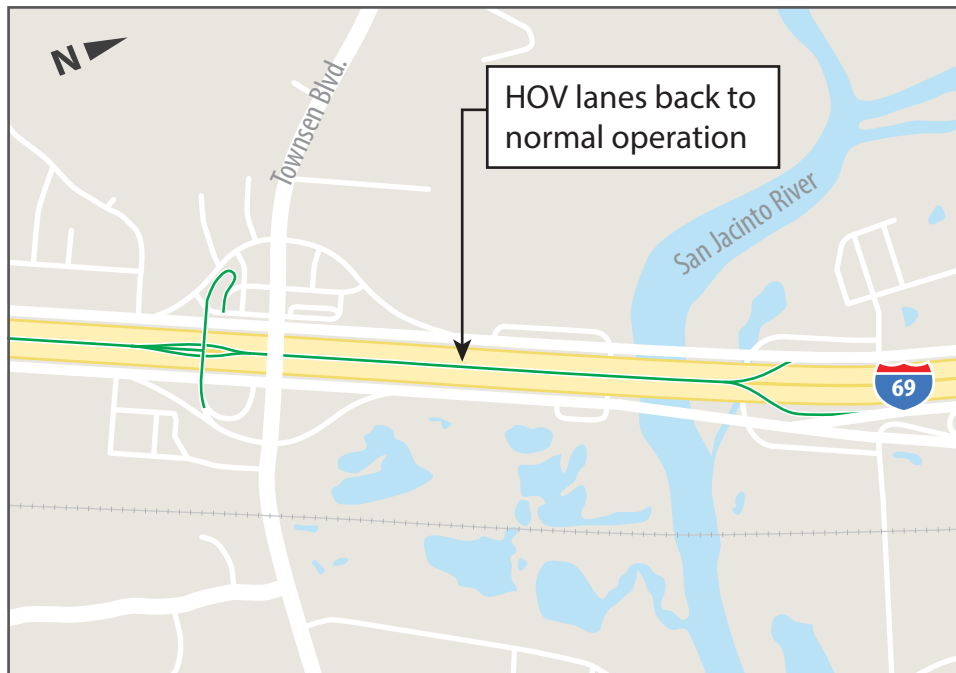

PROJECT DETAILS

During Hurricane Harvey, the main channel of the San Jacinto River shifted, impacting the I-69 southbound mainlanes bridge over the river. As a result, the depth and alignment of the river changed affecting the foundation of the bridge. The bridge was reconstructed to overcome future shifts and to restore the load carrying capacity on the bridge.

The project was expected to take six months to complete but the contractor, Webber, LLC Construction, worked feverishly to get it done sooner.

For more information on this project contact Danny Perez at (713) 802-5077. For scheduled lane closures in the Houston District including this project go to www.houstontranstar.org. All closures are subject to change due to inclement weather. Follow us on Twitter @TxDOTHoustonPIO.
